HELP YOUR PATIENT’S MAXIMIZE THEIR ABILITY TO COMMUNICATE

The number of persons aged 65 years and older is growing more rapidly than the rest of the U.S. population. Hearing impairment is the third most commonly reported chronic problem affecting the aged population. There’s no reason to struggle to communicate! Even with a well-fit hearing aid, communication can still present a problem for many hard of hearing individuals.

COMMUNICATION STRATEGIES teaches skills known to maximize effective communication abilities. This complimentary program consists of 5 sessions run by Audiologists and trained Student Doctors of Audiology from A.T. Still University. Recommend that your patients join us for skills training, communication help, and fun!
